## Personal Summary:

Results-oriented Backend Developer specializing in web development, known for delivering efficient solutions. Proven expertise in Java, Spring Boot, and full-stack development. Committed to staying updated on industry trends.

## Professional Experience

JINDAL STEEL WORKS, TORNAGALLU, BELLARI DIST, KARNATAKA | DEC 2019 – DEC 2022

### Backend Developer:

- Assistant Backend Developer, Java Spring Boot
- Contributed to the development of an ERP model project, ensuring seamless integration and efficient data management within the system.
- Spearheaded the design and implementation of a robust stock management application, enhancing inventory control and optimizing operations.

### Technology Proficiency:

- Demonstrated comprehensive expertise in Java, Spring Boot, JPA, REST API, and MySQL, effectively leveraging these tools to deliver high-quality solutions.
- Utilized web services to streamline data flow and enable smooth communication between various components of the software architecture.

## Technical Skills

### Coding Languages

Java Javascript SQL HTML CSS

### Frameworks & Libraries

SpringBoot ReactJs Tailwindcss MySQL  
ReactStrap

### Tools

Git GitHub Figma

## Education:

AUGUST 2015 – JUN 2019

- Bachelor of Engineering / PROUDADEVARAYA INSTITUTE OF TECHNOLOGY, HOSPET, KARNATAKA

## Projects

### 1. React Responsive Portfolio (React.js) [🔗](#)

- Crafted a responsive single-page website showcasing the portfolio.
- Implemented modern design principles, creating a visually appealing platform that effectively communicates professional capabilities.

### 2. Zomato Clone (Frontend) [🔗](#)

- Designed a Zomato-like website using HTML and CSS with React.js.
- Implemented an intuitive user interface, resulting in a user-friendly platform with a X% increase in user satisfaction.

### 3. Event Tracker Website: [🔗](#)

- Developed a comprehensive event tracking website, leveraging modern technologies to provide real-time information on global events, ensuring a dynamic and responsive user experience.
- Hosted project on surge.

### 4. Blogging App (Full Stack) [🔗](#)

- Architected a feature-rich blogging platform with Spring Boot and React.js.
- Implemented user authentication using Spring Security with JWT, creating a secure and scalable platform with a X% increase in active users.

### 5. Weather App (Full Stack) [🔗](#)

- Engineered a real-time weather app using Spring Boot, React.js, and MySQL.
- Leveraged Spring Boot for backend logic, React.js for the frontend, and MySQL for data storage, resulting in a robust application with a X% increase in user engagement.

### 6. More... [🔗](#)

## Courses:

- One Year Program (Apr 22 - Present): SCALER ACADEMY FULLSTACK DEVELOPMENT
- Mastering Data Structures, Computer Science Fundamentals, DSA, OOPS, CN, OS, frameworks (Spring),
